

DESOADDI AS5336

Major component

- Matting agent , Polymer

Property

- Excellent filling properties effect for scars and grain defects.
- Excellent Buffering properties.
- Excellent milling performance.
- Slow drying speed.

Specification

- Appearance (25 °C): White pastes
- Solid content (%): ~33%
- pH(10%): ~7.5
- Electric charge: Anionic

Application

- By hand with stripping knife, on the defect, in a heavy way.
- Add 5% pigment for dyed leathers.
- Hang leathers about 4 hours.
- Buff(the next day)with paper 400#, once or twice.

Safety

- The product is not classified as dangerous chemicals.
- Comply with use of chemicals precautions.
- Read and follow the **Material Safety Data Sheet**.

DESOADDI AS5336
